Comfort Heat

Comfort Heat is a production and development company of heating cables, mats and control systems which offers the long-lasting and easy to install electric heating systems for:

- Heating and comfort of domestic and public buildings,
- Frost and ice protection of buildings, engineering and pipe systems;
- Frost prevention and temperature maintenance of technological pipes;
- Ice prevention of road and railway infrastructure.

The performance of Comfort Heat is focused on a continuous elaboration and innovations, interest in market demand and newest research works, cooperation with Kaunas University of Technology and leading European electronic manufacturers.

In 2011 Comfort Heat has been acknowledged by Business News for contribution to a better future of Lithuanian economy, as well as for its high solvency ratio which is achieved only by 2% of companies operating in Lithuania.

In 2013 the company introduced the quality management system according to ISO 9001 and ISO 14001 standards and is now taking the lead in implementing knowledge management system. The company has been increasing its productive capacity into R&D - leading advanced engineering solutions to ensure consistent satisfaction of high - demand customers and our partners, following the principles below:

- Reliability,
- Professionalism,
- Excellent design,
- Fast and qualified service.

The clients of Comfort Heat range from electric heating systems wholesalers, construction material dealers, petroleum and food companies to government and private railway and road infrastructure bodies. Comfort Heat exports its products to Latvia, Estonia, Finland, Norway, Poland, Hungary, Romania, Slovakia, Belarus, Russia and the United Kingdom, and it continues to expand its export markets.

CTAE-100

twin conductor heating mat

Comfort
Heat

CTAE-100 is a twin conductor heating mat of 100 W/m² output, with extra aluminium foil braid (with memory), drainage wire and fiberglass mesh. It is self-adhesive on concrete base. Green line design, environmentally friendly heating mat has no lead.

Floor heating mat **CTAE-100** is designed for lying under a new floor, and is compatible with renewable flooring materials. It can be laid directly into tile adhesive/glue layer.

Installation:

It can be laid directly on top of old tiles and under carpet flooring. The heating mat can also be laid under parquet, parquet boards and laminate. It is designed for installation in a kitchen, hall, bedroom and livingroom, and other indoor premises.

CSCV-150

single conductor heating mat

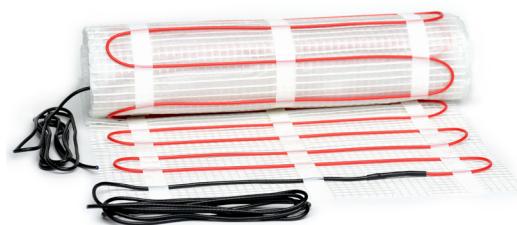

Comfort Heat

CSCV-150 is a single conductor heating mat of 150 W/m² output, with extra aluminium foil braid, drainage wire and tinned cooper screen and fiberglass mesh. It is self-adhesive on concrete base.

Floor heating mat **CSCV-150** is designed for installation for both, new and renewable floor. It can be laid directly into adhesive/glue tiles layer.

Installation:

It can be laid directly on old tiles in a bathroom, kitchen, hall, bedroom, livingroom or other premises under tiles, carpet, marble and granite flooring.

CATE-80

aluminium heating mat

Comfort Heat

CATE-80 is a twin conductor aluminium heating mat of 80 W/m² output for "dry" room heating. It is suitable for installation of new or renewable heated floor. It can be laid directly under laminate or parquet using "dry" method (without adhesive/glue).

Installation:

It can be laid directly under parquet, parquet board or laminate in a kitchen, lounge, children's room or other premises.

CAHF-25/50/100 mirror heating foil

Mirror heating foil **CAHF-25/50/100** is used to prevent mirror steam. Whether it is a small or large bathroom, it is ideal solution to mirror steam in houses, apartments and hotels.

Installation:

It is quick and easily installed, applied on by simply sticking the adhesive foil on the back of a mirror. These products are low - cost and easily installed; designed for new and renewable bathrooms. The heating can be switched on/ off using a switch of a bathroom or mirror light.

Technical data

Voltage	230 V
Output	25 W / 50 W / 100 W
Thickness of mat	1 mm
Connection cable	1 m
Max temperature	+90 °C
Protection class	IP44
Warranty	2 years

CFTAV-300 double conductor heating mat of 300 W/m² output, made with double insulation (M2), an aluminium foil and tinned copper screen (with memory), conductor fluoropolymer insulation and polypropylene overjacket. The cable is UV resistant.

It is designed for stairs, pavements, driveways, entrances to car parks, bridges, landing of ramps, etc.), ice prevention, or unfreezing soil in winter (construction sites).

Installation: CFTAV-300 can be laid into concrete or stone dust layer, directly under tiles, with purpose of frost protection of entrances, driveways, car parks, ramps, pavements and bridges. It can be laid directly on frozen soil covering it with rockwool mats afterwards.

Technical data

Voltage	230 V
Type	Double conductor
Output	300 W/m ²

CTAV-10

twin conductor heating cable

Comfort Heat

CTAV-10 is a twin conductor heating cable of 10 W/m output, with aluminium tape and tinned cooper screen with memory. This thin cable with memory can be laid directly into concrete or directly into tile adhesive/ glue layer for installation of new or renewable floor. **CTAV-10** is accustomed to pipe frost protection whereby the cable is installed on pipe, under thermal insulation layer, compatible within cold stores.

Installation:

It can be laid directly on concrete or old tiles in a kitchen, hall, room or other premises under tile, as well as marble, granite, carpet, parquet, parquet boards and laminate flooring. **CTAV-10** can be also used for heating installation under wood flooring and for pipe frost protection, installing the cable on the pipe under thermal insulation layer or under thermal insulation layer in cold stores.

CTACV-20 is a twin conductor heating cable of 20 W/m output, it has a double protection (M2), aluminium tape and tinned cooper screen with memory, fluoropolymer insulation and polypropylene overjacket. The heating cable is UV resistant. It is designed for roof ice and snow melting systems (roof gutters and downpipes) and/or the soil frost prevention (ramps, driveways, entrances to car parks, pavements, bridges, stairs, etc.), and frozen soil in winter (construction sites).

Installation:

It can be laid in roof gutters, downpipes, roof edges and into concrete or stone dust layer under tiles for frost protection of entrances, driveways, car parks, ramps, pavements and bridges. The cable can be laid directly on frozen soil, whereby covering it with rockwool mats.

CTACV-30

twin conductor heating cable

Comfort Heat

CTACV-30 is a twin conductor heating cable of 30 W/m output, it has double protection (M2), aluminium tape and tinned cooper screen with memory, fluoropolymer insulation and polypropylene overjacket. The heating cable is UV resistant.

It is designed for roof ice and snow melting systems (roof gutters and downpipes) and/ or ground frost protection of ground (ramps, driveways, entrances, car parks, pavements, bridges, stairs, etc.), and frozen soil in winter (construction sites).

Installation:

It can be laid in roof gutters, downpipes, roof edges and into concrete or stone dust layer under tiles for frost protection of entrances, driveways, car parks, ramps, pavements and bridges. The cable can be laid directly on frozen soil whereby covering it with rockwool mats.

PIPEHEAT-10

self-limiting heating cable with plug

Comfort Heat

PIEPEHAT-10 is a self-limiting heating cable with a plug, of 10 W/m output, it has thermoplastic/ fluoropolymer overjacket.

It can be installed directly on surface of pipe whereby the cable is fixed alongside two layers of adhesive aluminium tape for covering or inserted into pipe through a metal fitting otherwise.

PipeHeat-10 is quick and straightforward to set up for connection: simply plug it into a socket, for example, when temperature drops below 3 °C, and plug it off when it is warm enough (air temperature above 3 °C), or you can set-up the cable together with a thermostat, saving your time and money. The wide range of PipeHeat-10 cables serves your choice for a proper length and power output that stops pipes from freezing.

ComfortTouch is an electronic, user-friendly, touch screen thermostat used for electric heating systems control; has floor, room and built-in sensors, overall energy saving monitoring; compatible with other sensors, convenient to use a clearly setup device.

Factory-set weekly program takes climate conditions into account and is applicable to a 24-hour command; in turn, it makes programming individual preferences easy. In addition, you can set-up up to six different weekly/ daily scheduled temperatures. When you are away, lower setting will reduce energy consumption, whilst it ensures your comfort level. The thermostat incorporates a smart-clock which directs the supply of preferred temperature at the start of a set command.

ComfortTouch thermostat is flexible to correct mistakes and can be set-up to child safe mode; it has an electric counter, and 12 language choices. Data program retains information for an indefinite time.

Innovative thermostat **iComfortReg** brings in new control parameters and manages heating systems operations of a livingroom, bedroom, kitchen, children's room and etc., or several residential properties (apartment, house, countryside house) at once. The iComfortReg thermostat has floor sensor, energy-saving mode, seven-day programming function. Connecting to Wi-Fi (home router) a smartphone application enables you to access control of up to 32 heating systems, all connected into one local network. With your smartphone, you can control the user-friendly heating system from anywhere you are- from home or other side of the world. All what you need is a Wi-Fi network.

This is a convenient solution to a fast-pace lifestyle of modern people, who value comfort and manage their time. The applet allows a user to control every room in real time- to identify and control temperature of heated floor within the scale of + 5 °C to + 45 °C. The **iComfortReg** thermostat is suited for installation in a standard wall mounting box, and it fits into well-known switch frames.

ETO2-4550

microprocessor based thermostat for snow melting system control

ETO2-4550 is a programmed microprocessor controller for ice and snow melting systems. It controls two independent zones according to the data from two separate sensors (one roof sensor **ETOR-55, ETF-744/99** and one ground sensor **ETOOG-55**) or two similar sensors (2 roof sensors **ETOR-55, ETF-744/99** or 2 ground sensors **ETOOG-55**). Optimal operation is ensured, thanks to output control which makes the system effective and economical. The thermostat is DIN rail - mounted in panel or wall - mounted with a cover box.

Additional functions: control of electric or water-based ice and snow melting systems, efficient control – minimising energy consumptions, alarm relay with external signal, time extension of residual heating and language options.

Remote control: ETO2 thermostat can be controlled from a distance via external signal: system: switch ON/ OFF, or heating period extension switch ON option.

Used for: frost protection on roof gutters and downpipes; frost protection of steps, entrances, driveways, parking lots, ramps, sideways and bridges.

Technical data

Voltage	115/230 V AC 50/60 Hz
Three outlet relays	3 x 16 A / 11 kW

ETR2-1550

electronic thermostat for snow melting system control

Comfort Heat

ETR2-1550 is an electronic thermostat which comes with temperature and moisture sensors designed for ice and snow melting systems control. It controls one zone according to roof sensor data (**ETOR-55, ETF-744/99***) or ground sensor data (**ETOQ-55***). It can reach up to 16A (ON / OFF up to 3600 W). Optimal operation function is linked to output control in different weather conditions, what makes the system effective and economical. The thermostat is DIN rail - mounted in panel.

Additional functions: indication of heating operation, temperature, humidity and period extension of residual heating.

Used for: frost protection of roof gutters and downpipes; ice and snow protection of steps, entrances, driveways, parking lots, ramps, pathways, bridges and small ground areas.

GTe / GTe-F self-limiting heating cable for downpipe protection

Technical data

Output	18 W/m (at 0 °C) 36 W/m (in ice at 0 °C)
Voltage	220/240 V AC
Dimensions	10,5x5,9 mm
Overjacket	UV resistant
GTe	Thermoplastic
GTe-F	Fluoropolymer (F)
Min bending radius	35 mm
Max temperature	+65 °C ON or OFF
Min install. temperature	-30 °C

A – In snow and ice water the heating cable will operate at full power.

B – As snow begins to melt and water drains away, the heating cable self-regulates to half a power.

C – As it gets warmer, the heating cable will reduce its power output.

Maximum length of the cable (m) in one electrical circuit depends on the temperature:

Ambient temperature	230 V

FSM-CT/CF self-limiting heating cable (Ex) up to +85 °C

Comfort Heat

FSM2-CT self-limiting heating cable of **11 W/m** and **17 W/m** output can be used for heating, temperature maintenance and frost protection of pipes. The cable is produced with nanotechnologies, ensuring durable benefits; it withstands the temperature of **up to +85 °C** (when turned off). It can be installed in residential, public and commercial buildings and within industrial hazardous (Ex) zones.

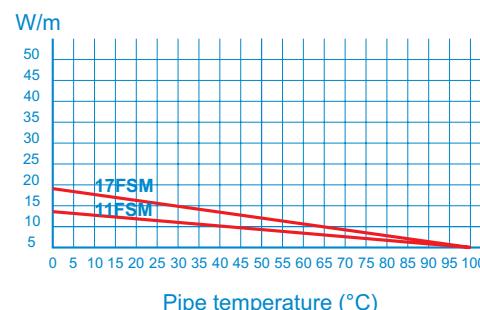

FSM2-CF cable can be installed within chemically hazardous zones, that of bitumen, oil products, food and industrial oils and other chemical products, because approved for use in both, safe and hazardous areas.

Installation: the cable is laid onto small diameter pipes under thermal insulation layer.

Technical data

Voltage	220/240 V AC
Output	11W/m ir 17 W/m (+10 °C)
Dimensions	10,5x5,9 mm
Overjacket	Thermoplastic(CT) Fluoropolymer (CF)
Min bending radius	20-25 mm
Max temperature:	
•Cable switched on	+65 °C
•Cable switched off	+85 °C
Min install. temperature	-40 °C (CENELEC -20 °C)
Temperature class	T6

Maximum length of the cable (m) in one electrical circuit depends on the temperature:

FSE-CF, FSEw-CF self-limiting heating cable (Ex) up to +100 °C

Comfort Heat

FSE2-CF, FSEw2-CF self-limiting heating cable, of **17 W/m, 31 W/m, 45 W/m** and **60 W/m** output for heating and frost protection of industrial pipes, can be installed in both, safe and hazardous (Ex) zones. The cable is produced with nanotechnologies, ensuring long-lasting benefits, withstands the temperature of up to **100 °C** (when switched ON or OFF).

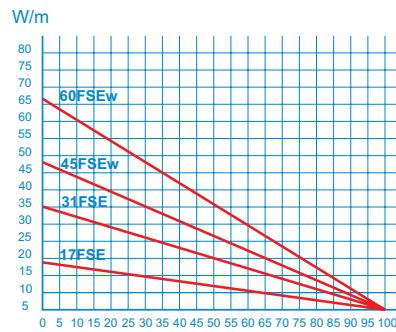

FSE2-CF, FSEw2-CF cables are made with fluorpolymeric overjacket which is resistant to chemically hazardous environments (that of bitumen, oil products, food and industrial oils and other chemical products production).

Installation: the cable is used for installation of industrial technological pipes within chemically hazardous (Ex) zones.

Technical data

Voltage	220/240 V
Output	17 W/m, 31 W/m, 45 W/m and 60W/m (+10 °C)
Dimensions	12,3x5,6 mm
Overjacket	Fluorpolymer (CF)
Min bending radius	30 mm

FSU-NF self-limiting heating cable (Ex) up to + 250 °C

Comfort Heat

FSU2-NF is a self-limiting heating cable of **15 W/m, 30 W/m, 45 W/m, 60 W/m, 75 W/m** and **100 W/m** output for heating and frost protection of high temperature industrial pipes. It can be installed in both, safe and hazardous (Ex) areas. The cable is produced with nanotechnologies, ensuring long-lasting benefits, withstands the temperature of **up to 250 °C** (when switched ON or OFF).

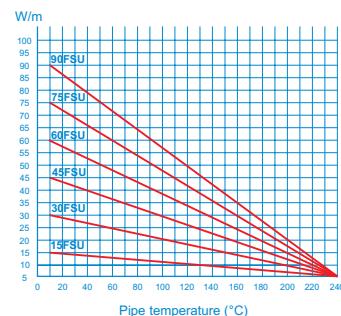

FSU2-NF cable is made with a fluoropolymer overjacket which is resistant to chemically hazardous environments (that of bitumen, oil products, food and industrial oils and other chemical products production).

Installation: for frost protection and temperature maintenance of industrial pipes, oil terminals and refinery, and food industry pipes.

Technical data

Voltage	220/270 V
Output	15 W/m, 30 W/m, 45 W/m, 60W/m, 75 W/m, 100 W/m (+10 °C)

AHT constant power heating cable (Ex) up to +425 °C

Comfort Heat

AHT is a parallel circuit, mineral insulated, cut-to-length, constant power heating cable of **15 W/m, 30 W/m, 50 W/m, 70 W/m, 100 W/m** and **150 W/m** output. It is designed for frost protection and heating process of industrial pipes with high temperature. Suitable for use in both, safe and hazardous (Ex) areas, can withstand the temperature of **up to +425 °C** (when switched off).

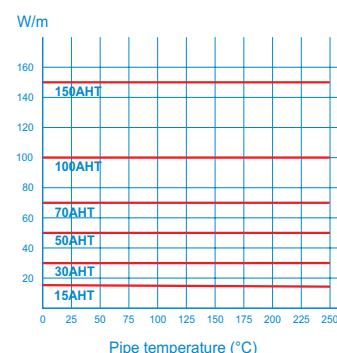

AHT is a flexible and mechanically robust cable with an extruded aluminium overjacket which retains some flexibility and is resistant to high temperature. Available in 100-150 m reel. It is cut- to-length and can be easily connected to a power cable with support of junction boxes or connectors.

CT-FL capillary thermostat (Ex) (0 °C...+40 °C, 20 °C...+300 °C)

CT-FL/2C/A and **CT-FL/2C/C** are capillary thermostats which contain a liquid filled sensing bulb, connected to an electric switch via a capillary tube. At rise of a pipe surface temperature, the liquid in the bulb expands, enabling the switch to turn ON, and at drop down of set temperature level of a pipe surface, liquid contracts, so that the switch turns OFF. The sensing bulb which indicates line or reservoir surface temperature is positioned in between a surface and insulation layers, using valve or other pipeline fittings.

Installation: the thermostat is designed for frost protection and temperature maintenance control of industrial pipes within hazardous (Ex) zones.

Technical data

Voltage	230 V AC 50/60 Hz
Maximum load	16 A / 3600W
Sensor type	Capillary bulb
Temperature range:	
• CT-FL/2C/A	0 °C ... +40 °C
• CT-FL/2C/C	+20 °C ... +300 °C
Ambient temperature	-20 °C ... +120 °C
Safety class	EEx d IIA, IIB, IIC T6
Dimensions	137x137x70 mm

POWERMATCH Micro

controller for pipe heating systems

Comfort
Heat

POWERMATCH Micro is an electronic digital controller with fine LCD display, designed for pipe heating system control. The controller supported by two sensors (of air and pipe surface area), automatically indicates changes in air and pipe surface temperature, and directly adjusts the impulse ratio of periods at which the heating cable is energised and switched off, so that delivered heat matches heat losses.

Installation: the thermostat is designed for frost protection and temperature maintenance control of industrial technological pipes with safe and hazardous (Ex) zones.

Air curtains

Comprehensive range, electrically controlled **air curtains** maintain required temperature, avoid drafts and hot or cold air getting into a room when door or gate is open. A strong downward-facing blower helps to keep warm or cool air in room, prevents from insects flying in and outside air out through the opening. Air curtains reduce energy costs and ensure free traffic for customers and goods.

Usage: in cafes, restaurants, hotels, department stores, stands, warehouses, auto repair shops, workshops, given high volume of people, transport and goods in general. Air curtains can also be used in refrigerators and freezers, as well as where cold air should not get into warm rooms, and warm air should not get into refrigerated ones.

DELTA fan heater is robust, reliable, quickly and easily creates pleasant air conditions, whilst maintaining a required temperature level within premises. It is easily transportable and can be used as for permanent and local heating. The **DELTA** fan heater comes in two sizes: 3-9 kW, small, and 15-21 kW, large. The fan heater with timer T has a time delay function (24 hours).

Usage: heating large premises, warehouses, workshops, sports halls, factories or garages, construction sites and ships; **DELTA** fan heater can be used both, temporarily and permanently.

Infrared heater SB

Comfort Heat

SB is an infrared heater used for heating of offices, sports halls, churches, industrial and agricultural structures.

The infrared heater transmits energy and warms up people and surfaces in a room.

Installed in: Churches, workshops, separate work spaces in office, department stores, farms and other premises. The heaters are installed onto ceiling or suspended at a required height, minimum 1m from the heated surface.

Comfort Heat

Innovative control at your fingertips

Four different needs – one floor heating solution

Touch screen: easy, intuitive and animated touch menu navigation and programming in 12 different languages

Smart device access: a smartphone allows system monitoring through QR code scanning and online webpage

Programmable: easy scheduling and adaptive control ensures comfort temperature is set at the required time.

Always working: 5-year battery backup of clock and calendar so settings are still in place after power interruptions
